THRIVE

VERTICAL

Education

SERVICES

- Managed EBMS Infrastructure (Firewall/Switching)
- Managed ThriveCloud
- Managed Backup
- Cybersecurity Bundle (Endpoint Security and Response, Secure DNS Gateway, Advanced Email Security, and Security Awareness Training)
- Managed Patching

CHALLENGE

The accredited, co-ed, private school for preschool through grade eight was operating on technology that was nearing end of lifecycle, including its firewalls, switches, servers and on-prem exchange. Since the internal IT director was leaving, the school wanted to implement an outsourced solution to provide updated technology to serve the school body of 80 faculty/staff and 360 students. To facilitate these changes, the school searched for an IT and Cybersecurity partner that was trusted and recommended and proven in the education space.

SOLUTION

Thrive was chosen over other vendors because of its NextGen technology solutions backed by an expert engineering team and 24x7 resources, along with glowing recommendations from other educational institutions. The Thrive team replaced the school's outdated technology with NextGen solutions, including Managed EBMS Infrastructure (firewall/switching), Managed Backup and Managed Patching. Thrive also implemented Cloud adoption and collaboration with Managed ThriveCloud and Office 365. Thrive's Cybersecurity Bundle, complete with Endpoint Security and Response, Secure DNS Gateway, Advanced Email Security, and Security Awareness Training was deployed to keep staff and student data secure.

RESULT

Thrive's complete lift and shift from on-premise to ThriveCloud has been a learning process for school administrators. As a result of Thrive's technology upgrades and managed services, the school can now work remotely while enhancing its overall security footprint. The structured process, onboarding procedures and internal end-user support from Thrive were instrumental in making school operations more efficient, secure, scalable and innovative. The entire IT infrastructure is now managed by Thrive, allowing school administrators to remain focused on their students.

How can Thrive help your business?

Thrive is a leading provider of outsourced IT Infrastructure designed to drive business outcomes by helping you get the most out of your IT.
